

Update as of : July 23, 2015

## **EU REACH (SVHC) Substances of Very High Concerns**

AVR Global Technologies - Official Statement

AVR Global Technologies is committed to protecting our environment and the world's natural resources. Early adoption and full compliance with the European Union's directive for RoHS is a primary mission. In good faith, we support this directive in our MFG processes and drive our supply chain to do the same.

AVR Global Technologies does not use SVHC's. As a downstream manufacturer of components and cables assemblies AVR Global Technologies depends on the due diligence and good faith of our supply chain partners of raw material suppliers to comply with supplier code of conduct and notify AVR Global Technologies should their operations or products require reporting.

Materials / Substances of Very High Concerns are declared if about 0.1% of the Article of Regulation (EC) No. 1907/2006 and subsequent amendments. Directives are continually being amended. The most current list of SVHC's that AVR Global Technologies is aware of can be found at <http://echa.europa.eu/candidate-list-table>

If a part should be incorrectly classified as REACH compliant AVR Global Technologies liability will only be replacement of the specific product or credit of the specific product or component.
